

# Hazardous Location Handlamps

Illuminate your hazardous location work areas easily and safely with this LED explosion proof handlamp. Made with tough, durable, certified and proven LED hazardous location lights, this handlamp will meet the OSHA requirements for lighting a construction area while keeping your workers safe. The rugged Tuffite handle and aluminum guard make this a mainstay of the hazardous location line.

Customizable options are available by adding an explosion proof plug or a different length or type of cord.

Standard models include 16/3 SOOW cord and non-explosion proof plug.
